- Learn about the **steps of a drop test** procedure.
- Know **all types** of fires **doors in Wisconsin facilities**.

KNOWLEDGE TO

HIT THE STREET WITH. . .IMMEDIATELY.

SEMINAR TO BE HELD DURING WEDNESDAY’S LUNCH & LEARN
Wed, Nov 4th 2009 (12PM)
At The WI State Fire Inspector’s Conference

Presented by: **Jeff Rinderle**
of **Rinderle Door Company**

Jeff Rinderle has been in the door business for nearly 17 years, full time. He grew up in the family business, and spent 7 of those years in the field as a service and installation technician. He found his way into the sales and consulting field, surveying and assisting building owners with the best solutions for their applications (standard and fire-rated).

He has given seminars and workshops to customers and maintenance associations in Southeastern Wisconsin, keeping up with the latest codes and also helping train the service personnel at Rinderle Door.

Jeff has met with several Wisconsin inspectors to gain insight as to the most common and not-so-common issues seen in the field to reveal the most valuable information possible.

Personally, he appreciates those that dedicate their lives to the service and safety of others. He considers it a privilege to speak in front of you, share his knowledge and learn from you as well.
